Liam Armstrong

Toronto, ON | 431-998-6868 | Larmst14@my.centennialcollege.ca

Junior Software Developer

Fast Learner | Detail-Oriented | Problem Solver

Summary of Skills

- A fast-learning and adaptable student of Software Engineering Technology, with the proven ability to quickly build proficiency in new technologies and tools
- Foundational knowledge of: Java, JavaScript, C#, C++, HTML, and Python
- Experience using tools: Visual Studio Code, GitHub, Visio, MS Office
- Strong understanding of Agile methodology and its application in software development
- Familiar with fundamental quality assurance and software testing concepts
- Detail-oriented with a strong focus on accuracy, quality and timely delivery
- Strong teamwork, communication, and problem-solving skills developed through applied software engineering academic projects and demonstrated with a high GPA

Education

Software Engineering Technology (Co-op) Advanced Diploma Sept. 2025 - Present
Centennial College, Toronto, ON

Key Courses: Java Programming | Linux/Unix | C# Programming | Python Programming | Database Concepts | Advanced Database Concepts (SQL) | Web Application Development | Client-Side Web Development | Software Requirements Engineering | Software Systems Design

Academic Projects

Software Requirements Specification (SRS) Project

- Collaborated on the creation of a SRS using Agile methodology to define requirements for an application designed to connect end users with individuals selling products and services
- Contributed to analysing user needs and defining various project requirements to support the development of the proposed application

Database Concepts Group Project

- Collaborated as part of a four-person team to design and develop a database requiring tasks to be completed in a specific sequence
- Ensured proper coordination and communication while completing database-related tasks
- Applied database concepts and problem-solving skills to address dependencies and prevent errors within the project

Web Development - Website Building

- Built small-scale connected websites using HTML and web development concepts
- Worked with unique images, colors, and layouts to create websites tailored to requirements
- Applied attention to detail when organizing website content and visual elements

Work Experience

Grounds Maintenance 2020 & 2021 Summer
Saugeen golf club, Port Elgin

- Performed general cleaning and grounds maintenance of the golf course, including maintaining areas surrounding the driving range
- Helped ensure the driving range and surrounding areas remained clean, organized, safe and well-maintained
- Demonstrated a strong work ethic through consistent completion of maintenance related tasks
